

# Wireless Surveying

## Why Survey?

- To save cost
  - eliminates wrong installation costs
  - reduces operational downtime costs
- To determine the ideal number of access points
  - check installation restrictions
  - specify where to install the equipment
- To specify what wireless spectrum can be used
- To check that critical areas are covered
- To define a **Bespoke Solution Design**
- To generate the **Bill of Materials**

## Get it right first time

*Daconi are wireless experts providing bespoke solutions that meet your requirements*
